STATE OF THE CHILDREN: EARLY LEARNING & CARE

Pacific Mountain Region
Grays Harbor, Mason, Thurston, Lewis, and Pacific (north) Counties
Our dream is that all children have a chance for a great start in life. We believe that they deserve access to high-quality basics of health, education, nurturing, and love. In fall 2019, one-third of the children in our region started their first day of kindergarten unprepared. We can do better! It is true that children and families living in poverty, or children learning English as a second language, may need a little extra support, but we are not talking about “those” children or “other” children. We are talking about “our” children.

Statement on Equity

Washington Communities for Children and Washington STEM recognize and respect social, linguistic, cultural, and ethnic diversity, and the unique needs of families and communities. We acknowledge opportunity gaps, based on race, ethnicity, gender, income, ability, culture, and geography, exist for children and families. We are actively engaged in systems-level change and approach these objectives with cultural humility, passion, and a commitment to persist in achieving equity.

Research and data play critical roles in identifying and elevating the needs of children and families in Washington state. However, existing research methods, and resulting data, are not immune to institutionalized and systemic racism, so we must analyze them with racial justice at the forefront. This report attempts to center community experiences and access to systems supports through the thoughtful selection and presentation of data that focuses on systems rather than individual outcomes. It uses the measures we have, though sometimes flawed, to illuminate systemic issues—policies, programs, and funding—that impact young children and families and that disparately affect racial groups. It also engages community to illustrate local, lived experiences in relation to these systemic issues. The data available to us as of the writing of this report is limited in depth and scope. We hope, in future reports, to include information on issues such as father engagement and the ability to disaggregate all system input data by race/ethnicity. We call on you to support efforts to listen to and learn from families, providers, and communities about their needs and strengths, and to ensure that we collect and analyze data with communities and co-design the necessary solutions.

Numbers included in this report are approximations used to provide regional estimates.
February 2021
OVERALL STATE OF YOUNG CHILDREN:

The Pacific Mountain region is home to 33,400 young children and their families. This report will address systems and conditions that promote their development and the actions you can take to support young children and families.

33,400 CHILDREN UNDER SIX IN THE REGION

14,600 (44 percent) of children under six are living in poverty*

*We define children in poverty as those in households at 200 percent of the federal poverty line, which is $52,400 a year.

Spanish, Vietnamese

Most common languages spoken at home other than English.

56% (18,800)

of children under the age of six have all parents in the workforce.

43% (8,000)

of children in our region with all parents in the workforce don’t have access to early learning in a licensed child care or ECEAP/Head Start program.

26% (2,900)

of child care licensed capacity was temporarily lost due to the COVID-19 pandemic and economic shutdown at the height of the crisis in June 2020.
THE ECONOMIC BENEFITS
OF INVESTING IN EARLY CHILDHOOD CARE AND EDUCATION

Research has shown that investing in high-quality early child care and education does more than provide a strong foundation for young learners. The ‘spillover’ effects of investing in children at an early age have been linked to a stronger economy, increased caregiver job stability, and a reduction in the cost for special education, healthcare, and criminal justice spending later in life.

Unequal opportunities due to poverty reduce our region’s economic prosperity. However, early investments can make a big difference down the road. For every one dollar invested in high-quality care in the early years of life there is a more than seven dollars return in terms of dollars saved on later interventions and upward economic mobility in adulthood.

Return on Investment*

Invest & Return
Every dollar invested in early childhood development yields a 7X return to the community.

Invest
Each low-income child in our region needs an investment of $24k per year, over 3 years, in order to receive high-quality early childhood education.

Develop
By ensuring the development of the most critical skills in early childhood, children begin school ready to succeed.

Sustain
Strong K-12 and higher education systems and jobs that pay a family wage build on our investments.

GAIN $500K
Per-child return on investment; students, and communities see increased wages, less need for supplemental services, and healthier, more robust local economies.

*Investment and gain figures are based on an estimate of year-round, full-day, quality care for low-income children, derived from the average cost ($1,960 per month) of programs currently providing this care.

This is a current estimate; however, the Department of Commerce is creating a report, to be released in 2021, that will provide more specific and regionalized estimates.

ECONOMIC IMPACT ON EMPLOYERS

Washington employers incurred costs of $2.08 billion in 2019 due to employee absenteeism resulting from a breakdown in child care coverage.

“Childcare providers are small business owners and should be recognized as such. The practice of resourcing small business and entrepreneurs to include reducing the obstacles to the creation of new businesses must be extended to the childcare industry as well. A healthy and robust childcare network is a key asset of a vibrant local economy.”

Lynnette Buffington, CEO, Greater Grays Harbor, Inc.

$129.7M
Annual cost employers incur due to lack of child care in the Pacific Mountain region.

4,000
Workers with children under six years old quit a job due to child care issues in the Pacific Mountain region.

2,000
Workers with children under six years old fired from work due to child care issues in the Pacific Mountain region.

**Estimates of regional numbers based on state-wide percentages
ECONOMIC IMPACT ON FAMILIES
Child care costs place a tremendous burden on families, impacting income in three areas: work time commitment, productivity levels, and long-term career. The median income of a family in our region is $61,158. The typical cost of child care is $10,261. The average family in our region pays 17 percent of their income for one child in child care.

ECONOMIC IMPACT FOR CHILD CARE PROGRAMS AS SMALL BUSINESSES
Working Connections Child Care is a subsidy program that helps income-eligible families pay for child care. The 75th percentile represents the subsidy rate at which families can access 75 percent of the child care market. Subsidy rates are currently far below the market rate for child care. Child care providers who accept Working Connections subsidies incur financial loss when the subsidy rate is below the actual cost to provide care. The Washington Child Care Collaborative Task Force will release a report in 2021 that will include the cost of quality care for early education programs. We will update the graphic below with those updated numbers when those reports are released.

**Quality refers to the average cost of programs that have been awarded the highest levels of quality (levels 4 or 5) by Early Achievers, Washington State’s Quality Rating System. This is a current estimate; however, the Department of Commerce is creating a report that will be released in 2021 that will provide more specific and regionalized estimates.**

*Estimates of regional numbers based on state-wide percentages*
EARLY LEARNING WORKFORCE

Our early learning and care system currently depends on 32,000 early learning and child care professionals in Washington state, and 1,648 in the Pacific Mountain region, of whom 83 percent are female. These individuals play a critical role in promoting the development and well-being of the young children in our region.

COMPENSATION

While early childhood educators are an invaluable resource, early childhood educators make far less than their K-12 peers, even when accounting for level of education. We expect child care employees to care for our children while their wages fall near poverty levels.

Average Hourly Wage

- $15.74 Child Care Teachers
- $14.31 Preschool Teachers
- $31.33 Kindergarten Teachers
- $25.90 Average of all Other Occupations in the Region

The average full-time child care teacher makes $32,735, compared to a self-sufficiency wage of $47,261 for one adult with one toddler.

50% of child care teachers with one dependent in our region would qualify for Medicaid.

25% of child care teachers with one dependent in our region would qualify for the low-income special supplemental nutrition program Women, Infants and Children (WIC).

The low pay of child care teachers is driven in large part by the fact that their salaries are paid out of tuition paid by families. The margins in the child care business are very narrow and this sector of the education workforce is essentially subsidizing the true costs of care with their personal income.

GROWING THE WORKFORCE

Strengthening the early care and education workforce in our region requires a focus on compensation and professional development investments to help sustain and expand the workforce needed to address our early care and education crisis. In order to meet the unmet early care and education workforce need in our region we would need over 680 additional educators.

Additional Educators Needed to Meet Regional Need

<table>
<thead>
<tr>
<th>Educators Needed</th>

<td>210</td>
<td>180</td>
<td>290</td>
<td>680</td>
</tr>
</tbody>
</table>

Numbers based on the assumption that 63 percent of children with all caregivers in the workforce would indeed use child care if it were to be available. (See citations on the last page for methodology.)
COVID-19 IMPACT
COVID-19 has further exacerbated the strain on the early child education system, putting it at risk of collapse. Families and employers will continue to struggle as parents in the workforce are even less likely to have the child care they need to return to work. Children are missing out on needed services.

81 child care programs (as of June 2020) have temporarily closed, and it’s likely that many of them will not open their doors again.

38 child care programs (totaling 458 jobs) in the Pacific Mountain region received a Paycheck Protection Loan.

Child care providers are essential workers. Those continuing to provide care during the pandemic are left to balance their need for income, risk of contracting COVID-19, and work of caring for their own children at home.

### Child Care Licensed Capacity Temporarily Lost

![Diagram showing child care capacity loss](image)

26% estimated capacity loss of 2,900 slots

**CHILD CARE CRISIS IN THE PACIFIC MOUNTAIN REGION**

Even before COVID-19, most of our region existed in a child care desert. Child care businesses were already reducing capacity or closing altogether as they became increasingly unable to bear the cost burden of providing high-quality care. In 2016, the Learning to Grow (LTG) child care center was devastated by fire. In attempting to find a new home, executive director Stephanie Smith encountered barriers in zoning, lack of space, inability to retain staff, and meeting existing family need. With significant backing from local leaders, LTG was awarded an Early Learning Facilities grant. The facility will provide much needed access to care, but Smith says there are still huge gaps in the child care system. “We are thrilled with the partnership with our community and legislators. As a business, child care is still severely under-resourced. Our community is in dire need of accessibly, quality care, and we still have a long way to go to meet the demand for our families and economy.”
EARLY CARE AND EDUCATION
ACCESS, AFFORDABILITY, AND QUALITY

By age five, 90 percent of a child's brain has developed. Investing in high-quality early childhood education builds the foundation for future learning, behavior, and health. We must focus on policies and programs that promote access, affordability, and quality for the 33,400 young children in our region.

LICENSED EARLY CARE: ACCESS

One major issue facing our early care and education system is access. Current licensed child care availability only meets the needs of approximately 36 percent (6,700) of children under six whose parents are in the workforce and need care in our region, with lower availability for infants compared to preschoolers. About 18,800 children under age six in this region have all parents in the workforce, and this lack of access to child care can, and likely will, have dramatic impacts on families and employers. We estimate that of children with all parents in the workforce, 63 percent would access child care if it was available, based on estimates from other state funded child care caseload forecasting reports. Researchers monitored supply and demand data and found pre-COVID-19 data to be the best estimate for assessing access to early care and education systems.

Children with all Caregivers in the Workforce vs Child Care Capacity*

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Licensed Child Care</th>
<th>Gap by age</th>
<th>Age Group as a Percent of Child Care Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infants (&lt;12 Months)</td>
<td>550</td>
<td>71%</td>
<td>8% for Infants (&lt;12 months)</td>
</tr>
<tr>
<td>Toddlers (12-29 months)</td>
<td>1,250</td>
<td>57%</td>
<td>19% for Toddlers (12-29 months)</td>
</tr>
<tr>
<td>Preschoolers (30-71 months)</td>
<td>4,870</td>
<td>28%</td>
<td>73% for Preschoolers (30-71 months)</td>
</tr>
</tbody>
</table>

Gap by age indicates the shortfall in licensed child care spots. Children may be in care with family, friends, neighbors, or license-exempt care.

Numbers based on the assumption that 63 percent of children with all caregivers in the workforce would indeed use child care if it were to be available. (See citations on the last page for methodology.)

*This visual reflects data prior to the impacts of COVID-19 pandemic.
LICENSED EARLY CARE: AFFORDABILITY

Child care costs are unaffordable for most families in our region. Families with two young children who make the regional median income spend up to 30 percent of their income on child care. The Washington State Department of Commerce states child care should cost no more than 7 percent of a family’s income.

35%

the percent of income paid to child care by families of color (median income of $60,100 a year) in the Pacific Mountain region, compared to 28 percent paid by white families (median income of $76,200 a year).

**Price by Age Group**

<table>
<thead>
<tr>
<th>Yearly Price</th>
<th>Infants (&lt;1 year old)</th>
<th>Toddlers (1-2 years old)</th>
<th>Preschoolers (3-5 years old)</th>
<th>Average net price for Grays Harbor College</th>
</tr>
</thead>
<tbody>
<tr>
<td>$11,004</td>
<td>$10,332</td>
<td>$8,988</td>
<td></td>
<td>$7,221</td>
</tr>
</tbody>
</table>

The average cost of early care across all ages is higher than the cost of attending Grays Harbor College full-time.

LICENSED EARLY CARE: QUALITY

Quality child care provides safe, loving, and stimulating environments for young children. Many early learning programs in the Pacific Mountain region have achieved a quality rating. However, quality care has a financial cost that varies by age. Families with infants and toddlers might not be able to afford quality care and may also have a more difficult time finding available slots in quality care programs.

*Researchers have found that children who receive quality child care enter school with better math, language, and social skills.*

**Regional Access to Quality Care by Age**

<table>
<thead>
<tr>
<th>Available Supply of Quality Slots</th>
<th>Potential Unmet Demand**</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Infants](&lt;12 months)</td>
<td></td>
</tr>
<tr>
<td>![Toddlers](12-29 months)</td>
<td></td>
</tr>
<tr>
<td>![Preschoolers](30-71 months)</td>
<td></td>
</tr>
</tbody>
</table>

Numbers are based on the assumption that 63 percent of children with all caregivers in the workforce would indeed use child care if it were to be available. (See citations on the last page for methodology.)

**Demand is calculated as 63% of children with all parents in the workforce.**
ECEAP, HEAD START, AND EARLY HEAD START

The Early Childhood Education and Assistance Program (ECEAP), funded by Washington state, and federally funded Head Start and Early Head Start are preschool programs for children of low-income families. ECEAP and Head Start allow low-income children to access high-quality preschool programs. Programming is either part-day or full school day (seven hours). Working families are often left to piece together care, relying on other licensed child care facilities, or family, friends, or neighbors to accommodate unmet child care needs.

COVID-19 IMPACT

As a result of the pandemic, 17 percent of the child care programs in our state have temporarily closed their doors, many of them for good, representing a temporary loss of approximately 30,000 in licensed capacity. At a time when many families are returning to work, and when many K-12 schools still have limited in-person instruction, the supports and care they need now more than ever are in question.

With only 24 slots in the Pacific Mountain region, only 1% of the infants and toddlers who qualify for Early Head Start have a spot available to them.

90% of ECEAP programs moved to a distance model in which educators met with children and families online or in socially distanced settings. In-person instruction was maintained for children with special needs.

202 child care programs in the region received Coronavirus Aid, Relief, and Economic Security (CARES) Act funding in order to stay open.

*Early Head Start can be delivered in a child care program or in a home visiting model. These data reflect Early Head Start delivered in child care programs only.
Help Me Grow: Connecting Families to Resources

Help Me Grow is a statewide, community-driven, resource and referral linkage system that connects young children and their families to appropriate services and community supports. Parents, caregivers, early learning, health, and other service providers can call, text, or email Help Me Grow and connect to caring people who are highly trained in child development. The resource navigators listen to families’ needs and link them to the most appropriate services.

Help Me Grow Washington: A Statewide, Regional Effort

Help Me Grow Washington is a network of communities across Washington that work together to create a resource grid of community services and supports. Help Me Grow listens to families, links them to services, and provides ongoing support.

Help Me Grow’s Key Components

- Child Health Care Provider Outreach
- Family & Community Outreach
- Coordinated Access Point
- Data Collection & Analysis
- Equity
- Policy & Advocacy

512 families were connected to Help Me Grow in the Pacific Mountain region in the last year.

What You Can Do

Additional Resources for Families - Paid Family Leave

Bonding is essential for infant development. When a caregiver consistently responds to their infant’s needs, it sets the stage for the growing child to build healthy relationships. In Washington, parents qualify for 12 weeks of paid leave to bond with a new baby or child. Birthing parents qualify for up to 16 weeks (18 for complicated pregnancies/births) of combined medical and family leave.

2,786 parents in the Pacific Mountain region took Paid Family Leave bonding time (January through September 2020).
THANK YOU

Washington STEM and Washington Communities for Children would like to thank the Department of Children, Youth & Families (DCYF) and Child Care Aware of Washington for providing data and collaboration on methodology and visualization. We would also like to thank the Department of Commerce (DOC) for providing funding support for these reports and the members of the DOC’s Child Care Collaborative Task Force for feedback and insight on the State of the Children project overall. Visions for Early Learning would like to thank the Grays Harbor Early Learning Coalition, Know and Grow Partnership for Early Learning, Lewis County Early Learning Coalition, Mason County Early Learning Coalition, and the Thurston Early Childhood Coalition for their contributions to families and children across the region. These partners’ contributions to this report and their commitment to equity in systems change have been essential to moving this work forward.
