

SENIOR SYSTEMS ENGINEER

Manshi Naik
Blue Origin

“I work at the nexus of all of these things. As a Systems Engineer, I take requirements from the science folks, the propulsion engineers, and all of the people doing product design.”

#ShelsSTEM

When a tour of a NASA facility left Manshi Naik awestruck, she knew she had to find a way to bring her biomedical engineering background to the aerospace industry. Now, as a Senior Systems Engineer at Blue Origin, Manshi develops procedures for engineering rockets.

FUN FACT: Manshi is a new dog mom! These days, she’s busy training Daisy, her mini Golden Doodle.
